# Best Paper Award

Early Detection of Emissions Preceding Fires from Overloaded Electric  
Cables: Approach with Thermo-Cyclically Operated MOG  
Sensor Arrays and Numerical Signal Analysis

By

Rolf Seifert, Hubert Keller, Navas Illyaskutty, Jens Knoblauch, Heinz Kohler

Presented during SENSORDEVICES 2015, The Sixth International Conference on Sensor Device Technologies and  
Applications, held in Venice, Italy - August 23 - 28, 2015
